

HIGHLINE PORTAFAB CAB RISER AND CABGUARD

HPF Cab Risers Provide increased visibility and lockable storage space for your excavator. All cab risers come standard with a cabguard (note: cabguards are not ROPS certified) and are available in sizes ranging from 12" to 48" high. To decrease the shipping height, cab risers 36" and taller are equipped with a hydraulic tilting mechanism. HPF Cabguards come equipped with a removable face for emergency egress, and can optionally be mounted with front and rear halogen work lights.

Stationary Cab Riser
